This page was left blank intentionally.

I declare that, to the best of my professional knowledge and belief, I meet the definition of an Environmental Professional, as defined in the American Society for Testing Materials (“ASTM”) E1527-21 Standard.

I have the specific qualifications based on education, training, and experience to assess a property of the nature, history, and setting of the Subject Property. I have developed and performed all appropriate inquiries in conformance with the standards and practices set forth in 40 CFR Part 312.

I am under contract for this specific assignment, and I have no other side deals, agreements, or financial considerations with the User or others in connection with this transaction. This report is written to meet the ASTM E1527-21 requirements, as well as to document the non-scope conditions within the project limits.

Dana A. Lutheran

1 Executive Summary

Southern Environmental Group, Inc. (SEGi) was contracted by Holly Ridge Investment Properties, LLC (herein referred to as the “User” or “Clients”), to perform an American Society for Testing Materials (“ASTM”) E1527-21, Phase I Environmental Assessment (ESA) on four (4) parcels of land, herein referred to as the “Subject Property”, encompassing approximately 980 acres and having Onslow County Parcel ID numbers 001971, 027857 and 011593 and Pender County Parcel ID number 4227-56-5933-0000. The Subject Property is located on the west side of NC Highway 50/West Ocean Road, near Holly Ridge, in Onslow and Pender Counties, North Carolina.

The ASTM E1527-21 identifies **Recognizable Environmental Conditions (RECs)** as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment, 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment.

De minimis conditions are not recognized as environmental conditions. A *De minimis* condition is one that generally does not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Therefore, conditions determined to be *de minimis* conditions are not recognized environmental conditions or controlled recognized environmental conditions. 42 U.S.C. § 9601(22) defines a “release” as “any spilling, leaking, pumping, pouring, emitting, emptying, discharging, injecting, escaping, leaching, dumping, or disposing into the environment (including the abandonment or discharging of barrels, containers, and other closed receptacles containing any hazardous substances or pollutant or contaminants). The potential adverse impacts were assessed through the visual inspection of the Subject Property and of the surrounding properties, through research on available databases, and through interviews. The scope of this assessment does not include evaluation of the potential existence of either asbestos or lead-based paint within the existing structures.

The Phase I ESA provides an environmental review of the Subject Property to identify any existing or potential RECs that may reasonably be anticipated to be on or near the Subject Property in accordance with the guidelines set forth in the ASTM Standard E1527-21 Standard Practice for Environmental Assessment Process, as limited by the Scope of Work, the Limitations and Exceptions of Assessment, and the Qualifications and Limitations. This Phase I ESA is based on a review of existing conditions, reported pre-existing conditions, and operations at the Subject Property and adjacent properties, at the time of the investigation.

A regulatory database search report was provided by EDR. The database search involves researching a series of Federal, State, Local, and other databases for facilities and properties that are located within specified minimum search distances from the Subject Property. The EDR report did not identify the Subject Property on the databases researched. The EDR report identified five (5) off-site properties within the minimum ASTM search distances. Based on our review of available public records, the distances from the Subject Property and/or groundwater flow direction inferred from surface topography, these reported facilities do not represent a REC for the site. The EDR report did not identify the Subject Property on any of the listed databases.

This Executive Summary is an integral part of the Phase I ESA report. SEGi recommends that the report be read in its entirety.

2 Introduction

2.1. Purpose

The ASTM (2021) defines the purpose of the Phase I ESA as quoted:

"The purpose of this practice is to define good commercial and customary practice in the United States of America for conducting an environmental site assessment of a parcel of commercial real estate with respect to the range of contaminants within the scope of Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (42 U.S.C. §9601) and petroleum products. As such, this practice is intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner, contiguous property owner, or bona fide prospective purchaser limitations on CERCLA liability (hereinafter, the 'landowner liability protections,' or 'LLPs'): that is, the practice that constitutes 'all appropriate inquiry into the previous ownership and uses of the property consistent with good commercial or customary practice' as defined at 42 USC § 9601(35)(B)." (Page 1, ASTM, 2021).

In 2002, the Small Business Liability Relief and Brownfields Revitalization Act was passed, and it directed the United States Environmental Protection Agency (USEPA) to promulgate a rule defining due diligence for compliance with the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA). This rule, which is generally referred to as All Appropriate Inquiry (AAI), was adopted in 2002; it states that ASTM E1527-21 complies with the US EPA requirements for AAI. In some cases, the ASTM E1527-21 is more stringent than AAI.

The objective of this report is to identify the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment, 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment. It provides an environmental review of properties to identify any existing or potential recognizable environmental conditions that may reasonably be anticipated to be on or near the Subject Property in accordance with the guidelines set forth in the American Society for Testing and Materials ("ASTM") Standard E1527-21 Standard Practice for Environmental Assessment Process as limited by the Scope of Work, the Limitations and Exceptions of Assessment, and the Qualifications and Limitations. In addition, the purpose of the Phase I ESA is to document compliance with 24 CFR 50.3(i).

2.2. Detailed Scope-of-Services

SEGi will evaluate the property to determine the extent of apparent, previous site disturbances or business practices that have created a negative environmental impact on the Subject Property that might indicate past or present generation, handling, and/or storage of waste—the presence of Recognizable Environmental Conditions (RECs), Controlled Recognizable Environmental Conditions (CRECs) and Historical Recognizable Environmental Conditions (HRECs). The extent of this Phase I Environmental Assessment will include the following services:

- 2.2.1. A general site reconnaissance of the Subject Property that includes a visual inspection of the Subject Property's boundary to observe any obvious ground surface disturbances or unnatural soil and land features and an inspection of the tract to find evidence of environmental problems resulting from negligent business practices,
- 2.2.2. A review of available aerial photographs, topographic maps, Sanborn Fire Insurance maps, city and county directories, and relevant historical background data that is readily available and that may indicate previous land use(s),
- 2.2.3. Evaluate various relevant hazardous waste databases, permit databases, and property inventories from the federal, state, and/or local governmental agencies, which might identify a nearby known source of contaminant and/or property in non-compliance with current environmental regulations,
- 2.2.4. Provide a brief survey of adjacent land uses and those on permit databases identifying potential waste generators or waste storage facilities which might impact the Subject Property,
- 2.2.5. Preparing a narrative description of the Subject Property describing its general environmental status with various maps, photos and supporting documentation being attached,
- 2.2.6. Summarizing and concluding if further environmental study is needed and if so what type of study would be involved for a thorough evaluation to complete a "Due Diligence Review" of the Subject Property, and
- 2.2.7. An electronic copy of the report containing the information listed above.

The Phase I ESA provides an environmental review of properties to identify any existing or potential recognizable environmental conditions that may reasonably be anticipated to be on or near the Subject Property in accordance with the guidelines set forth in the American Society for Testing and Materials (“ASTM”) E1527-21 Standard Practice for Environmental Assessment Process as limited by the Scope of Work, the Limitations and Exceptions of Assessment, and the Qualifications and Limitations. This Phase I ESA is based on a review of existing conditions, reported pre-existing conditions, and operations at the Subject Property and adjacent properties, at the time of the investigation.

2.3. Significant Assumption, Limitations and Exceptions

The Phase I will be limited to the services listed in Section 1.2 and will not test for, look for, or review other items such as, but not limited to, radon, lead paint, asbestos, or indoor air quality unless otherwise indicated. This Phase I will not evaluate, in detail, adjacent land uses. This report will not evaluate the condition, quality, or availability of the groundwater beneath the Subject Property.

Furthermore, the report will list conditions which may limit the scope of the review as further below:

Southern Environmental Group, Inc. and its employees performed this Phase I ESA in accordance with the American Society for Testing and Materials’ Standard Practice for Environmental Site Assessments: Phase I Environmental Site Assessment Process as documented in their E1527-21 publication but limited as stated in this document.

Southern Environmental Group, Inc. has made no independent investigation as to the accuracy or completeness of the information obtained from the secondary sources or personal interviews and assumes that such information was complete and accurate.

The findings, conclusions, recommendations, and photographs provided in this Report are based on facts and circumstances, as they existed at the time the information was obtained. A change in any fact or circumstance upon which this report is based and / or any change in federal, state, or local laws or regulations may adversely affect the findings, conclusions, and recommendations as expressed in this document. Therefore, the findings, conclusions, and recommendations provided in this Report are applicable only to the property and dates identified within this report. This Report does not warrant against the future condition, operation, or activity that may or will occur either on the Subject Property, property adjacent to the Subject Property, or on other properties within the vicinity of the Subject Property.

The potential for environmental contamination was determined based on research into readily available information available from federal, state, and local agencies. However, groundwater flow can be determined only by using correctly installed groundwater wells, and contamination can be determined only by testing groundwater and soil samples in a certified laboratory using methods approved by the United States Environmental Protection Agency.

Southern Environmental Group, Inc. makes no representation regarding the value or marketability of the Subject Property being assessed or the property’s suitability for any specific use, and no value, marketability, or use should be inferred from the contents of this report.

Southern Environmental Group, Inc. relied on the services of a professional title company, a licensed attorney, or officials with the local tax office for the documentation on previous ownership of the Subject Property and does not guarantee the list provided by the third party is complete or accurate.

Southern Environmental Group, Inc. is not responsible for or liable for the independent conclusions, opinions, recommendations, actions, or information provided by other parties that is contained within this document. Southern Environmental Group, Inc. is not responsible for or liable for the independent conclusions, opinions, recommendations, actions, or information made by others based on the information contained in this Report. Southern Environmental Group, Inc. will have no liability in excess of the cost of this report.

NO IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE SHALL APPLY. Southern Environmental Group, Inc. MAKES NO REPRESENTATION OR WARRANTY THAT THE IMPLEMENTATION OR USE OF THE FINDINGS, CONCLUSIONS, OR RECOMMENDATIONS OF THIS DOCUMENT/REPORT WILL RESULT IN COMPLIANCE WITH APPLICABLE LAWS AND/OR REGULATIONS.

2.4. Special Terms and Conditions

There are no special terms or conditions with this Phase I EA.

2.5. Use of Report and Reserved Rights

Information reliance is defined by ASTM as:

"An environmental professional is not required to verify independently the information provided but may rely on information provided unless he or she has actual knowledge that certain information is incorrect or unless it is obvious that certain information is incorrect based on other information obtained in the Phase I Environmental Site Assessment or otherwise actually known to the environmental professional." (Page 12, ASTM, 2021).

This report is for the sole benefit and exclusive use of the User and their assigns, including associated lending institutions. It is possible that information exists beyond the scope of this assessment. Additional information, which was not found or available to Southern Environmental Group, Inc., at the time of report preparation, may result in a modification of the conclusions and recommendations presented herein. Any reliance on this report by third parties shall be at their own risk.

3 Site Description

3.1. Location and Legal Description of the Property

The Subject Property is located on the west side of NC Highway 50, near Holly Ridge, in Pender and Onslow Counties, in eastern North Carolina (see Appendix 10.1). The Subject Property consists of four (4) parcels of land (Tracts A- D, outlined in green, in the Figure 3.1 below) that encompasses approximately 1010-acres of mostly wooded land. Table 3.1 below provides the tax information for each tract.

Tract	County - Parcel ID	Acres (+/-)	Zoning	Legal Description
A	Onslow - 001971	353.63	R (Rural)	TR2A HOLLY RIDGE CAMP
B	Onslow - 027857	189.45	R (Rural)	PT TR A1 HOLLY RIDGE CMP
C	Onslow - 011593	378.47	R (Rural)	PT TR A1 HOLLY RIDGE CMP
D	Pender - 4227-56-5933-0000	305.57	Not Zoned	DESCRIPTON 305.57 PT HOLLY RIDGE CAMP TR

Table 3.1 Subject Property Tax Information

Figure 3.1: Subject Property Limit Map (Google Earth 2020).

3.2. Site and Vicinity General Characteristics

The Subject Property is bordered by NC Highway 50/West Ocean Road to the east and mostly wooded land on all other sides. Relatively flat topography is found across the Subject Property, and it is zoned as Rural Agriculture (RA) by Onslow County Planning and Zoning but not zoned by Pender County Planning and Zoning (see Figures 3.2 and 3.3 below).

Figure 3.1: Onslow County Zoning Map

Figure 3.2: Pender County Zoning Map

3.3. Current Use of the Subject Property

Currently the Subject Property is not being utilized. Logging activities have been undertaken on approximately 300 acres.

3.4. Descriptions of Structures, Roads, Other Improvements on the Subject Property

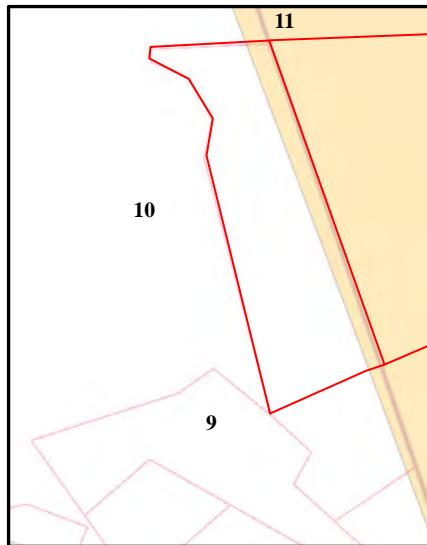

Gravel roads, with roadside ditches, provide access into and across the Subject Property. Other than culverts and remnant concrete building pads, there are no manmade structures within the Subject Property limits.

3.5. Current Uses of the Adjoining Properties

According to the Onslow and Pender Counties GIS, properties surrounding the Subject Property are as follows:

Map Key #	Owner	Address	Zoning	Current Use
1	ADIRONDACK TIMBER CO INC	NC HWY 50	RA	VACANT
2	EDENS TIMOTHY	NC HIGHWAY 50	RA	SALVAGE YARD
3	EDENS TIMOTHY	22003 NC HIGHWAY 50	RA	SINGLE FAMILY W/SALVAGE YARD
4	UNITED STATES OF AMERICA	NA	RA	MILITARY LAND
5	UNITED STATES OF AMERICA	NA	RA	MILITARY LAND
6	UNITED STATES OF AMERICA	NA	RA	MILITARY LAND
7	OTTAWAY DANNY L & JOAN M	NC HIGHWAY 50	RA	VACANT
8	OTTAWAY DANNY L & JOAN M	NA	NOT ZONED	VACANT
9	OAK ISLAND PTNR LLC	938S US HWY 17	NOT ZONED	VACANT
10	OAK ISLAND LAND & TIMBER LLC	NA	NOT ZONED	VACANT
11	OAK ISLAND LAND & TIMBER LLC	NA	RA	VACANT

Table 3.1 Parcel Information for Adjacent Properties

Figures 3.3 & 3.4: Adjacent Property Owner Maps with subject property outlined in red (Source: Onslow & Pender Counties' GIS).

4 User Provided Information

4.1. Title Records

A title search was not provided in time to be included with this report.

4.2. Environmental Liens or Activity and Use Limitations

The ERIS regulatory database report included a review of both Federal and State Engineering Control (EC) and Institutional Control (IC) databases. Based on a review of the database report, the site was not listed on the EC or IC databases. Please note that in addition to these federal and state listings, environmental liens or Activity Use Restrictions can be recorded at the county and municipal level that are not listed in the regulatory database reports. Environmental Lien and Activity and Use Limitation recorded against the Subject Property were not provided by the User.

4.3. Specialized Knowledge

The User stated they are aware of the Subject Property's prior use as Camp Davis, but they are not aware of any known or suspect REC or historical REC to be within the Subject Property limits (see Appendix 10.2).

4.4. Commonly Known or Reasonably Ascertainable Information

The eastern portion of the Subject Property was part of the former Camp Davis. The facility was used as an anti-aircraft military training base during WWII. The base was constructed in 1941. Training operations ceased on the base in 1944, and the base was closed by 1948, when the facilities were deconstructed, salvaged and the materials sold. The land was then released back to the lessees or sold. The base had more than 3000 buildings, ammunitions bunker, a rifle/pistol range and a landfill. However, only living quarters (i.e., barracks) were located within the Subject Property limits.

The User is not aware of any physical and/or ecological conditions that would result in a reduction in value of the Subject Property (see Appendix 10.2).

4.5. Valuation Reduction for Environmental Issues

No valuation reductions, for environmental contamination issues, were made apparent to SEGi, and no valuation reductions were identified during the evaluation process.

4.6. Owner, Property Manager, and Occupant Information

According to the Onslow and Pender Counties' GIS site, the Subject Property is owned by Onslow Water and Sewer Authority, herein referred to as the "Owner". There are no occupants on the Subject Property.

4.7. Reason for Performing Phase I

The User requested the Phase I Environmental Assessment as part of their own due diligence and to satisfy lending requirements.

5 Records Review

SEGi reviewed data from the required ASTM databases and contacted Environmental Data Resources, Inc. (EDR) for their Radius Map with Geo-Check. The Geo-Check report from EDR is included in Appendix 10.3. Results from this report indicate the target parcel is not listed on any Federal or State databases.

5.1. Standard Environmental Record Sources

The ASTM E1527-21 Standard requires the review of both federal and state databases to a specific distance from the Subject Property as illustrated in the table on the following page:

Database and Distances to Search	
Federal Sites	Distance/Parcels
National Priorities List (NPL)	1.0
Delisted NPL	0.5
CERCLIS List	0.5
CERCLIS NFRAP Site List	0.5
RCRA CORRACTS Facilities List	1.0
RCRA non-CORRACTS TSD Facilities List	0.5
RCRA Generators List	Property and Adjacent Parcels
Institutional/Engineering Control Registries	Property
ERNS List	Property
State Sites	
State-equivalent NPL	1.0
State-equivalent CERCLIS	0.5
Landfill or Solid Waste Disposal Sites	0.5
Registered Storage Tank (UST & AST) List	Property and Adjacent Parcels
Leaking Underground Storage Tank (LUST) List	0.5
Institutional/Engineering Control Registries	Property

Database and Distances to Search		
Voluntary Clean-up Sites		0.5
Brownfield Sites		0.5

5.1.1. Required Federal Database Searches

5.1.1.1. NPL and Proposed NPL

No site on the NPL or Proposed NPL list was identified within the searched distances of the Subject Property.

5.1.1.2. SEMS

No SEMS sites were identified within the searched distances of the Subject Property.

5.1.1.3. SEMS-ARCHIVE

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The EPA may perform a minimal level of assessment work at a site while it is archived, if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless new information indicates this decision is not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

No SEMS-ARCHIVE sites were identified within the searched distances of the Subject Property.

5.1.1.4. Resource Conservation and Recovery Act (RCRA) Corrective Action Report CORRACTS

No site on the RCRA CORRACTS list was identified within the search distance of the Subject Property.

5.1.1.5. RCRA non-CORRACTS Treatment, Storage and Disposal (TSD) Facilities

No site on the RCRA non-CORRACTS TSD Facilities list was identified within the searched distances of the Subject Property.

5.1.1.6. RCRA Generators

5.1.1.6.1 RCRA Large Quantity Generators (LQG)

No LQG sites were identified within the searched distances of the Subject Property.

5.1.1.6.2 RCRA Small Quantity Generators (SQG)/Conditionally Exempt Small Quantity Generators (CESQG)

There were no SQG –CESQG sites identified within the search distance of the Subject Property.

5.1.1.7. Institutional/Engineering Control Registries

No sites were identified on the searched database within the required search distances.

5.1.1.8. ERNS

No site on the ERNS list was identified within the search distance of the Subject Property.

5.1.2. Required State Database Searches

5.1.2.1. Inactive Hazardous Sites Inventory (SHWS)

No CERCLIS (SHWS) sites were identified within the search distance of the Subject Property.

5.1.2.2. Landfill / Solid Waste Disposal Sites (SWRCY)

No SWRCY sites were identified within the required search distance of the Subject Property.

5.1.2.3. Leaking Underground Storage Tanks (LUST)

No LUST sites were identified within the searched distance of the Subject Property.

5.1.2.4. Leaking Above Ground Storage Tanks (LAST)

No LAST sites were identified within the search distance of the Subject property.

5.1.2.5. Old Landfill Inventory (OLI)

There are no OLI sites within the Subject Property or the adjacent parcels.

5.1.2.6. Underground Storage Tanks (UST) on State and Tribal Lands

There are no USTs within the search area.

5.1.2.7. Responsible Party Voluntary Action Sites (VCP)

There are no VCP sites within the required search distances of the Subject Property.

5.2. Additional Environmental Record Sources

5.2.1. Supplemental Federal Databases

In addition to the required database searches, SEGi also reviewed the databases described below:

5.2.1.1. Superfund (CERCLA) Consent Decrees (CONSENT)

There are no CONSENT sites within the search distances of the Subject Property.

5.2.1.2. Records of Decision (ROD)

There are no ROD sites within the search distances of the Subject Property.

5.2.1.3. National Priority List Deletions (Delisted NPLs)

There are no Delisted NPL sites within the searched distances of the Subject Property.

5.2.1.4. Facility Index System/Facility Registry System (FINDS)

There are no FINDS sites within the searched distances of the Subject Property.

5.2.1.5. Hazardous Materials Information Reporting System (HMIRS)

There are no HMIRS sites within the searched distances of the Subject Property.

5.2.1.6. Material Licensing Tracking System (MLTS)

There are no MLTS sites within the searched distance of the Subject Property.

5.2.1.7. US Mines Master Index File (MINES)

There are no MINES sites within the searched distance of the Subject Property.

5.2.1.8. National Priority List (NPL) Liens

There are no NPL Liens sites within the searched distances of the Subject Property.

5.2.1.9. PCB Activity Database System (PADS)

There are no PADS sites within the searched distances of the Subject Property.

5.2.1.10. Formerly Used Defense Sites (FUDS)

One (1) FUDS site was identified within the searched distances of the Subject Property, but the Subject Property was not listed. Therefore, this site is not anticipated to be of concern.

5.2.1.11. INDIAN RESERV

There are no INDIAN RESERV sites within the searched distances of the Subject Property.

5.2.1.12. Department of Defense Sites (DOD)

Two (2) DOD sites were identified within the searched distances of the Subject Property.

SEGi reviewed the North Carolina Department of Environmental Quality (NCDEQ) Waste Management database, Laserfiche files for the site. One report reviewed was the Site Inspection Report for Camp Davis Site, dated June 17, 2008, and prepared by Parsons Infrastructure & Technology Group, Inc. Based on the report, the areas of munitions and explosives of concern (MEC) and munitions debris (MD) consisted of the Rifle & Pistol Range, the Coastal Anti-Aircraft Range, and the Range Complex No. 1. Each of these areas is located greater than 1,000 feet from the site. Based on the distance from the site, SEGi does not consider the FUDS and FUDS MRS listings as RECs to the site.

5.2.1.13. RCRA Administrative Action Tracking System (RAATS)

There are no RAATS sites within the searched distances of the Subject Property.

5.2.1.14. Toxic Chemical Release Inventory System (TRIS)

No site on the TRIS list was identified on the searched databases within the searched distances of the Subject Property.

5.2.1.15. Toxic Substances Control Act (TSCA)

There are no TSCA sites within the distances searched from the Subject Property.

5.2.1.16. Section 7 Tracking Systems (SSTS)

There are no SSTS sites within the searched databases of the Subject Property.

5.2.1.17. FIFRA/ TSCA Tracking System - FIFRA (Federal Insecticide, Fungicide, & Rodenticide Act)/TSCA (Toxic Substances Control Act) or FTTS

There are no FTTS sites within the searched distances of the Subject Property.

5.2.2. Supplemental State Databases

5.2.2.1. Hazardous Substance Disposal Sites (NC HSDS)

One (1) NC HSDS site was identified within the distances searched from the Subject Property. However, the listed site is lower in elevation than the Subject Property and, therefore, not anticipated to be of concern.

5.2.2.2. Above Ground Storage Tank (AST)

AST facilities are those with aboveground storage tanks that have a capacity greater than 21,000 gallons. There are no AST sites listed within the searched distances of the Subject Property.

5.2.2.3. LUST TRUST

The Underground Storage Tank Fund provides reimbursement for costs incurred during the cleanup of soil and groundwater contamination resulting from a release of petroleum from a commercial underground storage tank (UST). The Commercial Trust Fund has been established to reimburse tank owners, operators and landowners for costs associated with cleanups.

There are no LUST TRUST sites within the searched distances of the Subject Property.

5.2.2.4 Drycleaners

There are no DRYCLEANERS within the searched distances from the Subject Property.

5.2.2.5. Records of Emergency Release Records or Incident Management Database (IMD)

No IMD sites were identified within the searched distances of the Subject Property.

5.2.3. Additional Federal Sources

5.2.3.1. Former Manufactured Gas Sites (Coal Gas)

There are no Coal Gas sites within the searched distances of the Subject Property.

5.2.3.2. List of US Brownfield Sites

There are no Brownfields sites within the searched distances of the Subject Property.

5.2.3.3. Brownfield Projects Inventory

There are no Brownfield Projects Inventory sites within the searched distances of the Subject Property.

5.2.3.4. No Further Action Sites with Land Restrictions Monitoring (INST CONTROL)

No INST CONTROL sites were identified within the searched distances of the Subject Property.

5.2.3.5. Responsible Party Voluntary Action Sites (VCP)

There are no VCP sites within the required search distances of the Subject Property.

5.2.3.6. RCRA Non-Generator Sites

The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

There are no RCRA Non-Generator sites within the searched distances of the Subject Property.

5.2.3.7. UST FINDER RELEASE (UST FR)

The UST FR is a national composite of leaking underground storage tanks. This data contains information about, and locations of, leaking underground storage tanks. Data was collected from state sources and standardized into a national profile by EPA's Office of Underground Storage Tanks, Office of Research and Development, and the Association of State and Territorial Solid Waste Management Officials.

No UST FR sites were identified within the search distance of the Subject Property.

5.2.3.8. UST FINDER (UST FINDER)

EPA developed UST Finder, a web map application containing a comprehensive, state-sourced national map of underground storage tanks (UST), and leaking UST (LUST) data. It provides the attributes and locations of active and closed USTs, UST facilities, and LUST sites from states and from Tribal lands and US territories. UST Finder contains information about proximity of UST facilities and LUST sites to surface and groundwater, public drinking water protection areas, estimated number of private domestic wells and number of people living nearby, and flooding and wildfires.

There are no UST FINDER sites within the search distances of the Subject Property.

5.2.4. Additional Local Data/Information

5.2.4.1. Contaminated Water Wells

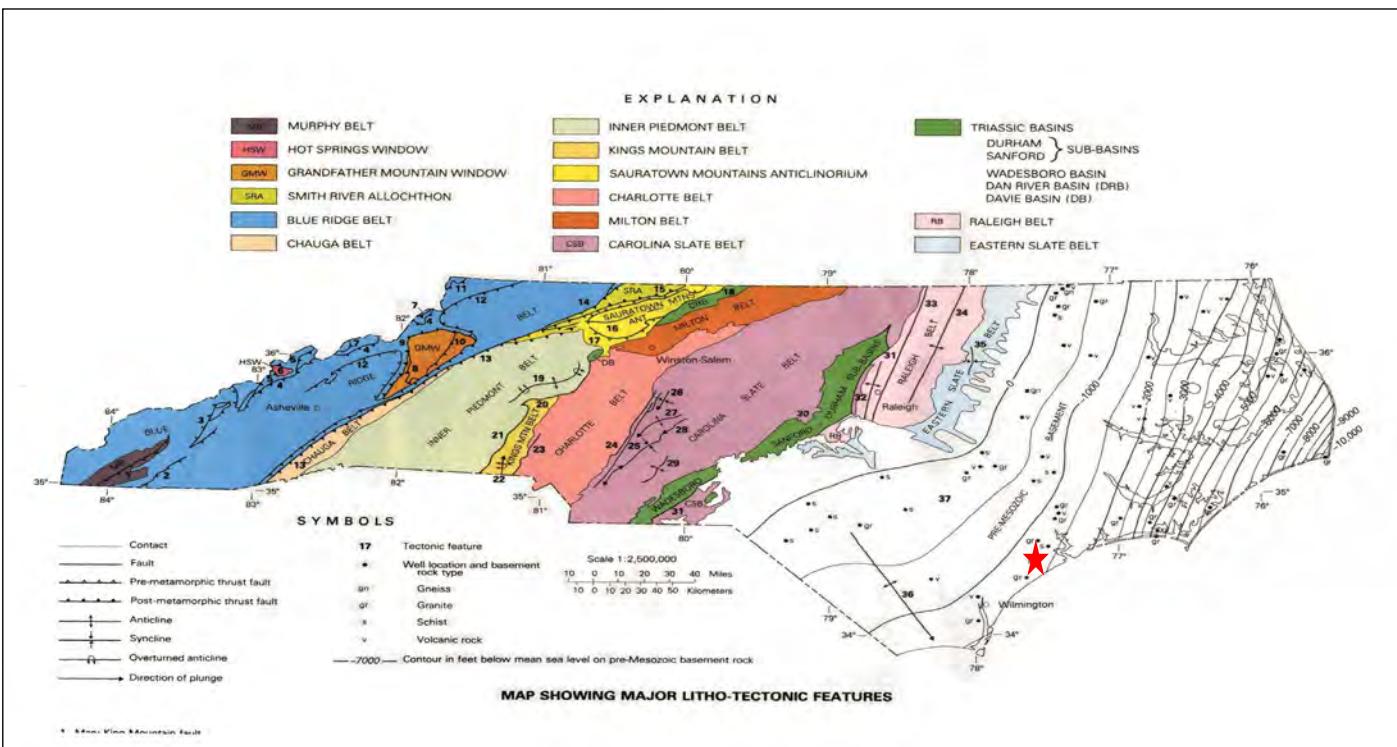

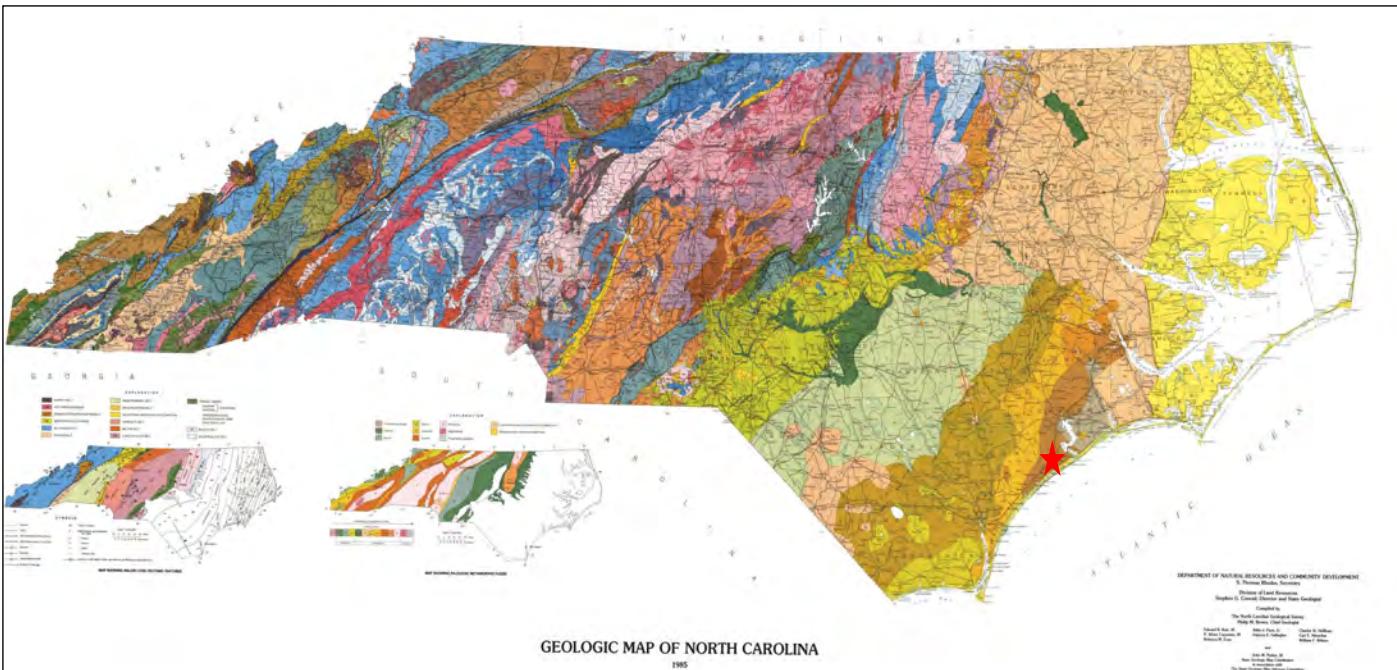

No site on the Contaminated Water Well list was identified, within the searched distances of the Subject Property or on the searched databases.

5.3. Physical Setting Source(s)

As required by Section 7.2.3 of the ASTM Standard, several other physical setting sources were obtained and reviewed as part of this Phase I ESA.

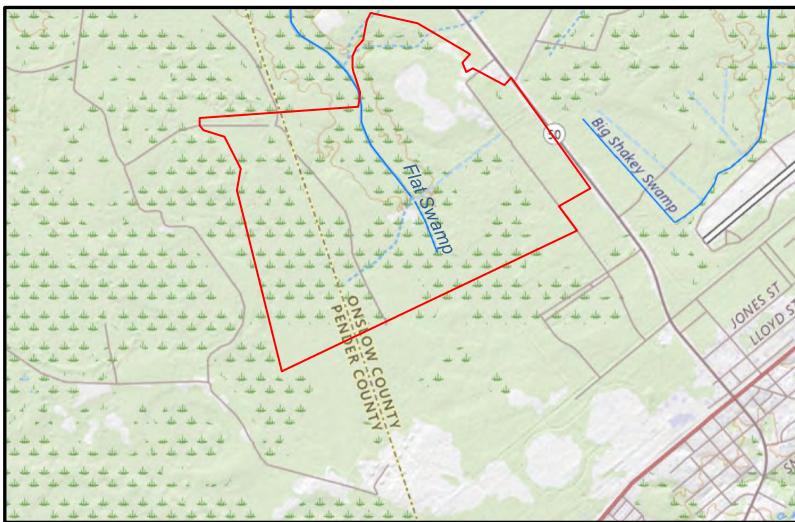

5.3.1 Geologic Maps

5.3.1.1. The Detailed Geologic Map of North Carolina & Litho-Tectonic Map of North Carolina

5.3.1.2. USGS Topographic Map

The Subject Property exhibits a relatively flat topography and is approximately 50 feet above mean sea level (see Appendix 10.8). Surface drainage is generally toward the Flat Swamp. The approximate Subject Property limit is outlined in Red, in the illustration below.

5.3.1.2. USDA Soils Map

The map below was obtained from the USDA Natural Resources Conservation Services Web Soil Survey data for Onslow and Pender Counties and depicts the soil types within the Subject Property boundaries, which are summarized in the following table:

Soil Type	Depth to Water Table (In.)	Infiltration Rate	Drainage	Hydric Rating
Foreston loamy fine sand (Fo)	24-42	Rapid	Mod. Well Drained	No
Woodington fine sandy loam (Wo)	0-12	Rapid	Very Poorly Drained	Yes
Torhunta mucky fine sandy loam (To)	0-12	Rapid	Very Poorly Drained	Yes
Muckalee loam (Mk)	0-12	Mod. Rapid	Poorly Drained	Yes
Pits	Water	-	-	-
Leon fine sand (Le)	0-12	Rapid	Poorly Drained	Yes
Stalling loamy fine sand (St)	12-30	Rapid	Somewhat Poorly Drained	No
Murville fine sand (Mu)	0-12	Rapid	Very Poorly Drained	Yes

5.4. Historical Use Information on the Subject Property

Historical information was obtained by reviewing historical aerial photos, the EDR Radius Report, Sanborn Report,

historical topographic maps, and the EDR's City Directory Search.

5.4.1. Fire Insurance Maps

A review of the Sanborn Fire Maps revealed there are no maps for this location.

5.4.2. Tax Files

Review of data, from the Onslow and Pender Counties tax office, did not turn up any information regarding RECs that was not already discovered via the searched federal, state, and local databases, as well as prior performed environmental assessments.

5.4.3. Historical Aerial Photography

Readily available historical USGS topographic maps and selected historical aerial photographs (at approximately 10-to-15-year intervals) provided Environmental Data Resources (EDR) were reviewed to evaluate land development and obtain information concerning the history of development on and near the Subject Property (see Appendix 10.6).

1938 NRCS Black and white, scale unknown (see Appendix 10.6): The 1938 black and white NRCS photograph depicts the Subject Property as undeveloped.

1949 NRCS black and white, scale unknown (see Appendix 10.6): The 1949 black and white NRCS aerial photograph does not have the resolution necessary to depict what remained after the demolition of the former Camp Davis, of which the Subject Property was a part, but does show the building pads and roads that remained.

Camp Davis, a World War II era U. S. Army temporary training base for field and coastal artillery. The eastern side of the Subject Property was part of Camp Davis during the period of active operation of the post during 1941-1944. Construction of garrison and training facilities began in December 1940, on purchased and leased lands that would eventually total 46,682 ac. More than 3000 buildings were rapidly constructed, and troops began to arrive in April 1941. Training operations for U. S. Army units ceased in 1944, though some use of a portion of the Camp by the U. S. Navy continued until 1948. Thereafter, Camp Davis was closed, facilities were deconstructed and salvaged, and assets were sold.

1964 NRCS black and white, scale unknown (see Appendix 10.6): In the 1964 black and white NRCS aerial photograph, the lighter areas are the previously open areas in which regeneration of trees is occurring. The previously built areas of Camp Davis are rapidly regenerating to what appears to be a mixture of pines and hardwoods.

1958 through 1998 EDR Historical Aerial Photography, black and white and color, 1" equals 1250 feet (see Appendix 10.6): These photographs depict the remaining hardscape in the area of the old Camp Davis barracks, with periods of thinning of woody vegetation. The remainder of the Subject Property appears to be undeveloped, woody land.

1998 through 2020 EDR Historical Aerial Photography, and color, 1" equals 1250 feet (see Appendix 10.6): The photographs depict the Subject Property as undeveloped and wooded with soil roads and roadside ditches in place.

5.4.4. Historical City Directories

There is no specific address currently associated with the site, though it is located along West Ocean Road and Dragstrip Road.

5.5. Historical Use Information on the Adjoining Properties

A review of historical aerials revealed the adjacent properties that would have generated or used known contaminants (see Appendix 10.6).

6 Site Reconnaissance

The objective of the site reconnaissance is to obtain information indicating the likelihood of identifying recognized environmental conditions in connection with the Subject Property.

6.1. Methodology and Limiting Conditions

Reconnaissance of the Subject Property was conducted on 5 May 2024. SEGi traversed the existing roads within the Subject Property, which was not clearly marked. Clearing limits and other visual identifiers were used to determine the inspection limits during this evaluation. A follow-up site inspection, on 24 September 2024, was conducted to ensure there have been no changes since the last evaluation and for better access into the densely wooded areas. Photographs were taken of the site, to document the conditions of the property, at the time of the evaluations (Appendix 10.4).

6.2. General Site Setting

The Subject Property is bordered by mostly wooded land to the north, south and west, with NC Highway 50 and a residential property, being used as an auto repair shop, abuts the Subject Property on its northeast side.

6.3. Site Observations

Access to the Subject Property is gated and logging activities were recently undertaken on approximately 1/3 of the Subject Property, specifically on the western portion. It appears the Subject Property is well maintained and used for hunting. Large concrete pads remain from the previous Camp Davis living quarters. Chemical sheens were not observed on the surface of the waters and no noxious odors were noted emanating from within the ditches, at the time of the reconnaissance. Otherwise, there was no evidence of dumping.

6.4. Interior Observations

There are no structures within the Subject Property limits.

7 Interviews

Information is requested from those individuals—the owner, project or site managers, government officials, and others such as local residents or occupants on adjacent parcels—that should, or might, have information regarding the property.

7.1. Interview with Owner or Owner's Agent and Occupants

The Owner completed the All Appropriate Inquiries Questionnaire (see Appendix 10.2) and stated they had no knowledge of any past releases and are not aware of any known contamination within or adjacent to the Subject Property.

7.2. Interviews with Local Government Officials

SEGi was unable to reach anyone at the Holly Ridge Fire Department who was able to provide any information pertaining to records of aboveground or underground storage tank releases, reported incidents of fires, hazardous materials, spills, leaks, or other similar circumstances that could be of environmental concern, for the Subject Property.

7.3. Interviews with State Government Officials

After a review of the EDR Radius Report and further investigation into the listed incidents, communication with State Government Officials was not necessary.

8 Findings

8.1. Transformers and Power Lines Findings

Two transformers are within the Subject Property. However, they appear to be in good working order, without signs of rust or leaking.

8.2. Findings of Known or Suspect Recognizable Environmental Conditions (RECs)

The ASTM E1527-21 identifies **Recognizable Environmental Conditions (RECs)** as the presence or likely presence of any hazardous substances or petroleum products in, on, or at a property: 1) due to any release to the environment, 2) under conditions indicative of a release to the environment; or 3) under conditions that pose a material threat of a future release to the environment.

There were no findings of known or suspected RECs, within or adjacent to the Subject Property.

8.3. Findings of Known or Suspect Controlled Recognizable Environmental Conditions (CRECs)

According to ASTM E1527-21, a REC resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a No Further Action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required

controls (e.g., property use restrictions, institutional controls, or engineering controls).

There are no known CRECs within the Subject Property boundaries or the required search area, and there is no evidence, in the form of a No Further Action letter or listed regulatory incident, that a release has ever taken place, in the past.

8.4. Findings of Historical Recognized Environmental Conditions (HRECs)

ASTM E1527-21 defines a Historical Recognized Environmental Condition as a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted residential use criteria established by a regulatory authority, without subjecting the property to any required controls. For a past release to be a HREC, it must be determined whether the past release was in a recognized environmental condition at the time the Phase I ESA was conducted (e.g., if there has been a change in the regulatory criteria).

The are no known HREC, within the Subject Property boundaries.

8.5. Data Gaps

The ASTM E1527-21 standard defines a “significant data gap” as “a data gap that affects the ability of the environmental professional to identify a recognized environmental condition.”

SEGi was unable to contact anyone at the Holly Ridge Fire Department who could provide any information about historical releases within the Subject Property limits or those adjoining properties. However, the data gap is not significant, as it did not affect SEGi’s ability to identify REC.

8.6. Conclusions

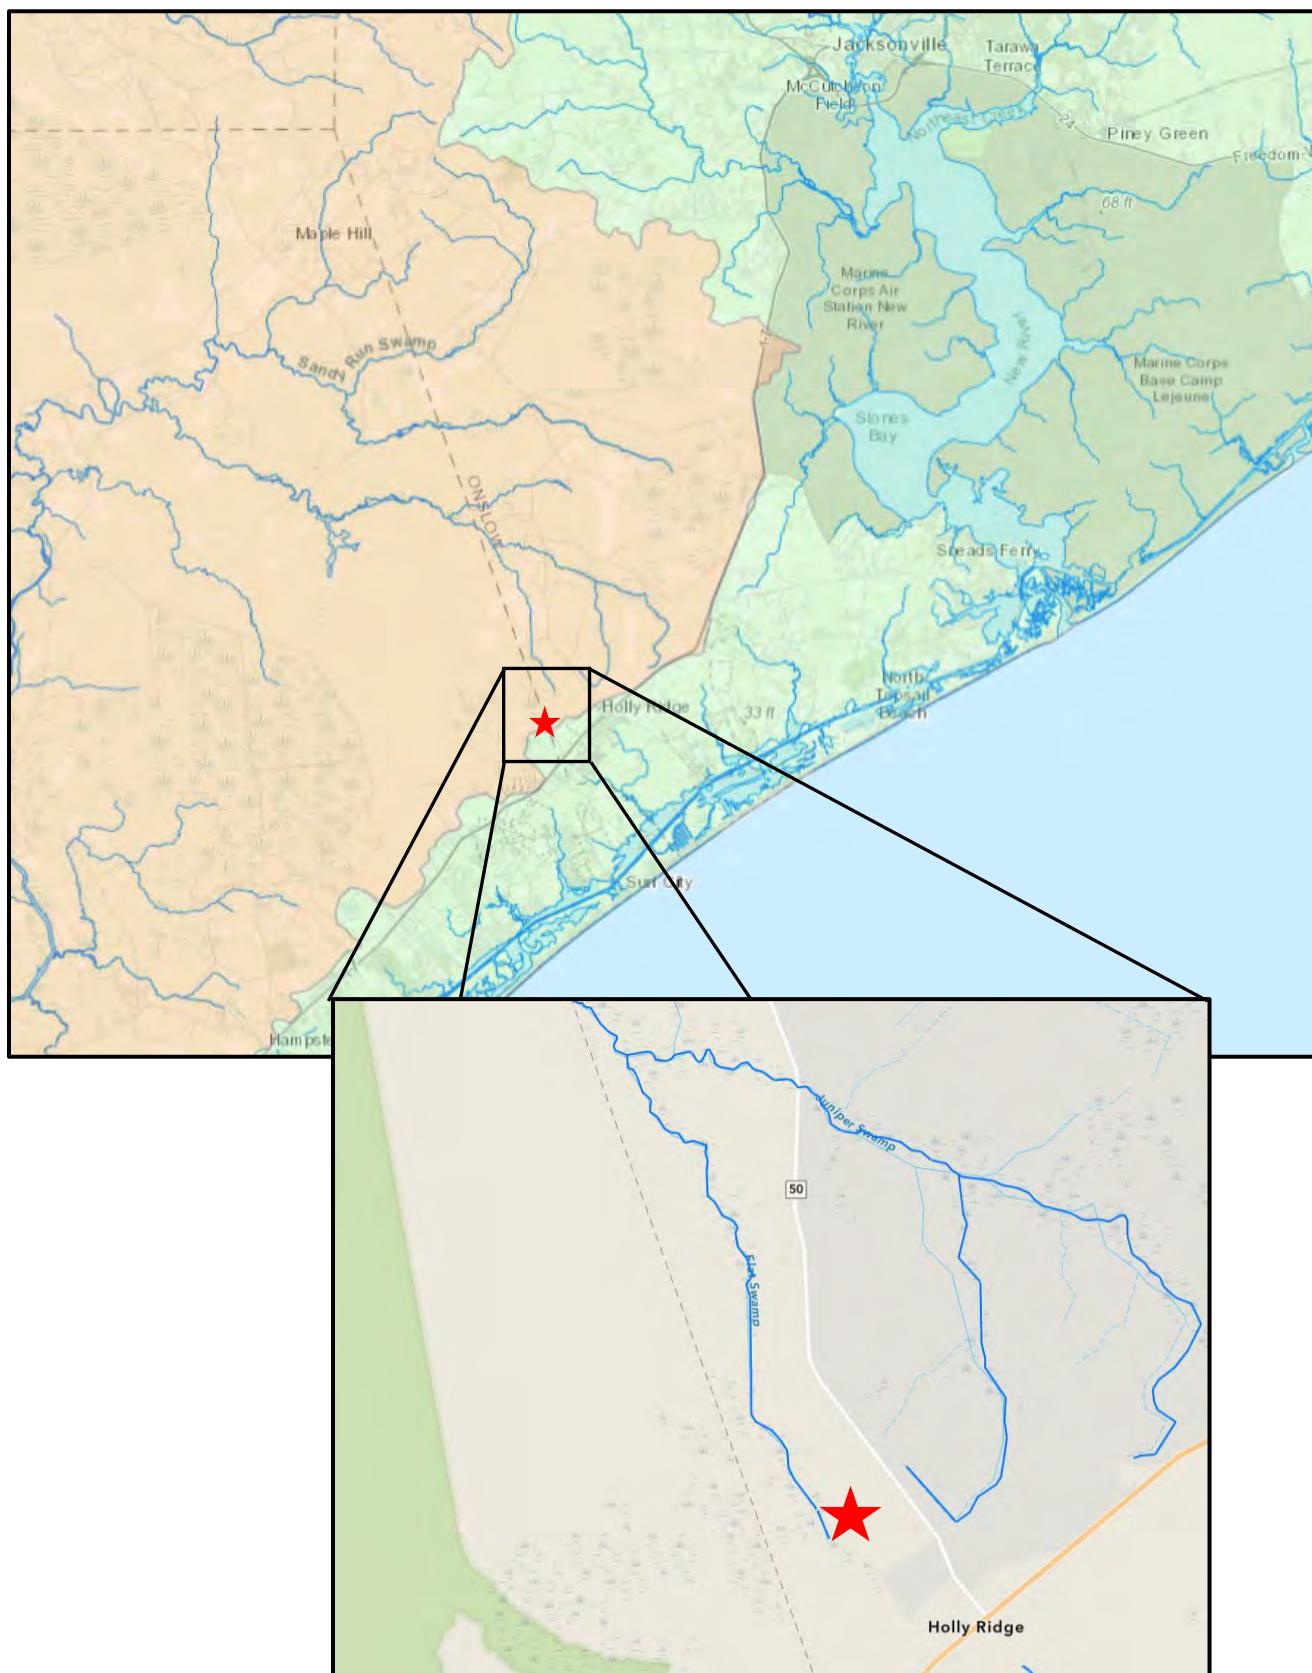

SEGi has performed a Phase I Environmental Site Assessment in conformance with the scope and limitations of ASTM E1527-21 Standard Practice, on four (4) parcels of land, encompassing approximately 1010 acres and having Parcel Identification numbers 001971, 027857 and 011593 and Pender County Parcel ID number 4227-56-5933-0000. The Subject Property is located on the west side of NC Highway 50, just north of Holly Ridge, in Onslow and Pender Counties, North Carolina. There was no evidence of RECs, CRECs or HRECs on or associated with the Subject Property. Any exceptions to, or deletions from, this practice are described in Sections 1.2, 1.3, 2.2, or otherwise within the text of this Report.

9.0. Recommended Action

This ESA has revealed no evidence of recognized environmental conditions in connection with the project site. There is no reason to suspect that the project site or adjoining properties are of sufficient environmental concern to warrant additional investigations. Therefore, a Phase II ESA **is not** recommended at this time.

10 Appendices

10.1 Vicinity Map

10.2 User's All Appropriate Inquiries Questionnaire

PHASE I EA ALL APPROPRIATE INQUIRIES QUESTIONNAIRE

Target Property ID: Wachovia Track	Owner: Onslow Water and Sewer Authority	Enviro. Technician: Dana A. Lutheran (SEGi)
1. Is property being used as for industrial purposes?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk
2. To the best of your knowledge has the property been used for an industrial use in the past?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk
3. Is the property used as a gasoline station, motor service/repair facility, commercial printing facility, dry cleaners, and photo storage disposal processing developing laboratory, junk yard or landfill or as a waste treatment or recycling facility?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk
4. To the best of your knowledge has the property been used as a gasoline station, motor service/repair facility, commercial printing facility, dry cleaners, photo developing laboratory, junkyard, or landfill or as a waste treatment storage disposal processing or recycling facility?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk
5. Are there currently, or to the best of your knowledge, have there been previously any damaged or discarded automotive or industrial batteries pesticides paints or other chemicals in individual containers of greater than 5 gal (19L) in volume or 50 gal (190L), taken together, stored on, or used at the property or at the facility?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk
6. Are there currently, or to the best of your knowledge, have there been previously any industrial drums (typically 55 gal (208L)) or sacks of chemicals located on the property or at the facility?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk
7. Has fill dirt been brought onto the property that originated from a contaminated site or that is of unknown origin?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk
8. Are there currently, or to the best of your knowledge, has there been previously any pits ponds or lagoons located on the property in connection with waste treatment or waste disposal?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk
9. Is there currently, or to the best of your knowledge, has there been previously any stained soil on the property?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk
10. Are there currently, or to the best of your knowledge, have there been previously any registered or unregistered storage tanks (above or underground) located on the property	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk
11. Are there currently, or to the best of your knowledge, have there been previously any vent pipes fill pipes or access ways indicating a fill pipe protruding from the ground on the property or adjacent to any structure located on the property?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk
12. Are there currently, or to the best of your knowledge, have there been previously any flooring drains or walls located within the facility that are stained by substances other than water or are emitting foul odors?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk
13. If the property is served by a private well or non-public water system have contaminants been identified in the well or system that exceeds guidelines applicable to the water system or has the well been designated as contaminated by any government environmental/health agency?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk
14. Does the owner or occupant of the property have any knowledge of environmental liens or governmental notification relating to past or recurrent violations of environmental laws with respect to the property or any facility located on the property?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk

15. Has the owner or occupant of the property been informed of the past or current existence of hazardous substances or petroleum products or environmental violations with respect to the property or any facility located on the property?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk
16. Does the owner or occupant of the property have any knowledge of any environmental site assessment of the property or facility that indicated the presence of hazardous substances or petroleum products on or contamination of the property or recommended further assessment of the property?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk
17. Does the owner or occupant of the property know of any past threatened or pending lawsuits or administrative proceedings concerning a release or threatened release of any hazardous substance or petroleum products involving the property by any owner or occupant of the property?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk
18. Does the property discharge waste water on or adjacent to the property other than storm water into a sanitary sewer system?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk
19. To the best of your knowledge, have any hazardous substances or petroleum products, unidentified waste materials, tires, automotive or industrial batteries or any other waste materials been dumped above grade, buried and/or burned on the property?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk
20. Is there a transformer capacitor or any hydraulic equipment for which there are any records indicating the presence of PCBs?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk

Adjacent / Abutting Property Assessment

Question	Owner/Occupants	Observed During Site Visit
1. Is any adjoining/abutting property used for industrial use?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk
2 To the best of your knowledge has any adjoining property been used for an industrial use in the past?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk
3. Is any adjoining property used as a gasoline station motor repair facility commercial printing facility dry cleaners photo developing laboratory junkyard or landfill or as a waste treatment storage disposal processing or recycling facility?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk
4. To the best of your knowledge has any adjoining property been used as a gasoline station motor repair facility commercial printing facility dry cleaners photo developing laboratory junkyard or landfill or as a waste treatment storage disposal processing or recycling facility?	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk	<input type="checkbox"/> Yes <input checked="" type="checkbox"/> No <input type="checkbox"/> Unk

Please provide a description of the historic and current use of the property:

For as long as we have owned it and for many years before that it has been used for forestry and recreational hunting.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E1527 - 21), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E2247 - 16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E1528 - 22) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

PENDER COUNTY
HOLLY RIDGE, NC 28445

TARGET PROPERTY SEARCH RESULTS

The Target Property was identified in the following databases.

Page Numbers and Map Identifications refer to the EDR Area/Corridor Report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Page Numbers and Map Identifications refer to the EDR Area/Corridor Report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

Lists of state- and tribal (Superfund) equivalent sites

NC HSDS: Hazardous Substance Disposal Site

A review of the NC HSDS list, as provided by EDR, and dated 08/09/2011 has revealed that there is 1 NC HSDS site within approximately1 mile of the requested target property.

<u>Site</u>	<u>Address</u>	<u>Direction / Distance</u>	<u>Map ID / Focus Map(s)</u>	<u>Page</u>

Environmental Interest/Information System:

The Resource Conservation and Recovery Act Information System (RCRAInfo) is EPA's comprehensive information system in support of the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. It tracks many types of information about generators, transporters, treaters, storers, and disposers of hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Lists of Federal NPL (Superfund) sites

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Lists of Federal Delisted NPL sites

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Lists of Federal CERCLA sites with NFRAP

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Lists of Federal RCRA TSD facilities

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Lists of Federal RCRA generators

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

EPA WATCH LIST: EPA Watch List

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g. the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Adminstration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

UMTRA: Uranium Mill Tailings Sites

Uranium ore was mined by private companies for federal government use in national defense programs. When the mills shut down, large piles of the sand-like material (mill tailings) remain after uranium has been extracted from the ore. Levels of human exposure to radioactive materials from the piles are low; however, in some cases tailings were used as construction materials before the potential health hazards of the tailings were recognized.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

PFAS RCRA MANIFEST: PFAS Transfers Identified In the RCRA Database Listing

To work around the lack of PFAS waste codes in the RCRA database, EPA developed the PFAS Transfers dataset by mining e-Manifest records containing at least one of these common PFAS keywords: PFAS, PFOA, PFOS, PERFL, AFFF, GENX, GEN-X (plus the VT waste codes). These keywords were searched for in the following text fields: Manifest handling instructions (MANIFEST_HANDLING_INSTR), Non-hazardous waste description (NON_HAZ_WASTE_DESCRIPTION), DOT printed information (DOT_PRINTED_INFORMATION), Waste line handling instructions (WASTE_LINE_HANDLING_INSTR), Waste residue comments (WASTE_RESIDUE_COMMENTS).

PFAS NPDES: Clean Water Act Discharge Monitoring Information

Any discharger of pollutants to waters of the United States from a point source must have a National Pollutant Discharge Elimination System (NPDES) permit. The process for obtaining limits involves the regulated entity (permittee) disclosing releases in a NPDES permit application and the permitting authority (typically the state but sometimes EPA) deciding whether to require monitoring or monitoring with limits. Caveats and Limitations: Less than half of states have required PFAS monitoring for at least one of their permittees and fewer states have established PFAS effluent limits for permittees. New rulemakings have been initiated that may increase the number of facilities monitoring for PFAS in the future.

PFAS ECHO FIRE TRAINING: Facilities in Industries that May Be Handling PFAS Listing

A list of fire training sites was added to the Industry Sectors dataset using a keyword search on the permitted facility's name to identify sites where fire-fighting foam may have been used in training exercises. Additionally, you may view an example spreadsheet of the subset of fire training facility data, as well as the keywords used in selecting or deselecting a facility for the subset, as well as the keywords used in selecting or deselecting a facility for the subset. These keywords were tested to maximize accuracy in selecting facilities that may use fire-fighting foam in training exercises, however, due to the lack of a required reporting field in the data systems for designating fire training sites, this methodology may not identify all fire training sites or may potentially misidentify them.

PFAS PART 139 AIRPORT: All Certified Part 139 Airports PFAS Information Listing

Since July 1, 2006, all certified part 139 airports are required to have fire-fighting foam onsite that meet military specifications (MIL-F-24385) (14 CFR 139.317). To date, these military specification fire-fighting foams are fluorinated and have been historically used for training and extinguishing. The 2018 FAA Reauthorization Act has a provision stating that no later than October 2021, FAA shall not require the use of fluorinated AFFF. This provision does not prohibit the use of fluorinated AFFF at Part 139 civilian airports; it only prohibits FAA from mandating its use. The Federal Aviation Administration's document AC 150/5210-6D - Aircraft Fire Extinguishing Agents provides guidance on Aircraft Fire Extinguishing Agents, which includes Aqueous Film Forming Foam (AFFF).

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by Southern Env. Group Inc. were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.
